

# *“I’m ok, I haven’t got Chlamydia”*

Think again – Chlamydia is the most common sexually transmitted infection

- R U between 15 and 24?
- 1 in 10 people under 25 who are sexually active have got Chlamydia
- Most people will not know they are infected as they will have NO signs or symptoms
- It is **easily** treated with antibiotics
- It can cause health problems including infertility if left untreated
- The test is FREE and you do it yourself

Free **SELF TESTING** kits available via [www.freetest.me](http://www.freetest.me), or [www.ocsp.org.uk](http://www.ocsp.org.uk), or call 01865 234495
