To all New Students

VERY IMPORTANT HEALTH INFORMATION – IMMUNISATIONS

COVID-19 VACCINATION

All students are strongly encouraged to take up the offer of a Covid-19 vaccination when eligible, ideally before arriving in Oxford at the start of the autumn (Michaelmas) term.

All adults in the UK currently have access to a vaccine though the National Health Service. If students arrive in Oxford having had the first dose of the Covid-19 vaccine elsewhere in the UK, they are encouraged to bring their vaccination card with them, or to have a record of their NHS number, and arrange to have the second dose of the vaccine in Oxford.

International students are eligible to access the Covid-19 vaccine for free, regardless of their nationality or immigration status. Students are advised to register with their College GP and to obtain an NHS number (http://www.nhs.uk/register). Further information about Covid-19 vaccination for international students can be found here: https://www.ukcisa.org.uk/studentnews/1730/COVID-19-vaccination-FAQs-for-international-students-

OTHER RECOMMENDED IMMUNISATIONS

Based on the advice of Public Health England and the Oxford College Doctors' Association, the University of Oxford’s Student Wellbeing Sub-committee strongly recommends that you receive the following vaccines before you arrive in Oxford, if you have not already received them:

- Meningococcal ACWY (MenACWY) if you are under 25 years of age
- Measles Mumps and Rubella - MMR1 and MMR 2, i.e. the normal two doses
- Tetanus, diphtheria and polio (known in the UK as the 3-in-one teenage booster)
- Human papillomavirus (HPV) vaccine if you are under 25 years of age

Contact your General Practice to arrange this, if necessary. These immunisations should be available outside the UK for international students.

FURTHER INFORMATION: MENINGOCOCCAL DISEASE

Students, especially new students, are at particular risk of contracting the disease and spreading it to others. Meningococcal disease can cause meningitis (inflammation of the brain) and septicaemia (blood poisoning) that can kill in hours, and those who recover may be left severely disabled. Please note that meningitis is not the same condition as encephalitis, against which students from some countries might have been immunised. If you have been immunised against any form of encephalitis, you will still need the MenACWY vaccine.

Further information on meningitis and the vaccine is available at the NHS Choices website:
https://www.nhs.uk/conditions/meningitis/

FURTHER INFORMATION: MEASLES, MUMPS AND RUBELLA (MMR)
Measles and mumps are circulating in the general UK population, particularly among young people. Several outbreaks of mumps have occurred at both universities in Oxford and, year-on-year, the number of cases continues to be significant. If you are not certain that you have received the 2 MMR immunisations, then in line with national policy, we recommend that you obtain them before arriving at University with a month between each dose.

Further information on measles, mumps and rubella, and immunisation against them, is available at the NHS Choices website:
https://www.nhs.uk/conditions/measles/
https://www.nhs.uk/conditions/mumps/
https://www.nhs.uk/conditions/rubella/

OTHER HEALTH ADVICE
Some students might be at an increased risk of influenza. If you are in a high risk group, contact your GP at the start of term to see if you need to have a flu vaccine (further information about the National Flu Immunisation Programme is available at:

ONCE IN OXFORD
When you register with the College Doctor or any other doctor in Oxford, you will be asked for the dates of your immunisations, and will have an opportunity to arrange immunisations if you still need to receive them. Information on college doctors and nurses is available at
https://www.ox.ac.uk/students/welfare/health/doctors?wssl=1

Yours faithfully

(on behalf of the University of Oxford Student Wellbeing Sub-Committee)

Eleni Kechagia-Ovseiko
Interim Director of Student Welfare and Support Services
